

Researchers find shortcomings in pregnancy and prenatal care for women with diabetes

Using Smartphones for Cancer Diagnosis and Management

Dr Cesar M. Castro

Dr. Castro is a translational oncologist with experience developing and harnessing nanotechnology and molecular imaging platforms for cancer purposes. His work offers a “less is more” approach – to generate robust cancer analyses using scant amount of specimens. Dr. Castro’s research has included funding from the V Foundation for Cancer Research, National Institutes of Health, Ovarian Cancer Research Fund, and the Department of Defense.
